

IMPORTANT

Do not use the eye for work.
Use the eye apparatus!

• SAFE USE:

• When the microscope stage is
down, use the objective lens to
the left for changing objectives. Do
not touch the revolving nosepiece.

• THE RANGING JOINT:

• The 1.25 inch setting screw on the
stage and the corresponding slots in
the revolving nosepiece determine
approximate positions.

• RANGING JOINT ICE BLOCKS:

• The setting screw (background)
is used to set the top edge of
the lens slide.
